DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 7, 8, 12-15, 18, and 20-22, are rejected under 35 U.S.C. 102(b) as being anticipated by Knapp, U.S. Patent # 4,241,316.

Fig. 2 of Knapp discloses an amplifier comprising: transistor 2 can be read as a load element (DMOS transistor), see spec. col. 9, lines 1-13.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4, 9, 10, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knapp, U.S. Patent # 4,241,316.

Although Knapp does not mention that his active element FET transistor is a VLSI CMOS transistor or a high frequency bipolar, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to substitute a VLSI CMOS transistor or a high frequency bipolar instead of a FET since this is a well

known practice in the art in the absence of unexpected results in order to have an optimum working condition for the circuit.

Allowable Subject Matter

Claims 6, 11, 17, 19, 23, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,456,159 B1, # 6,346,856 B1, # 6,002,299, # 6,353,345 B1, and # 5,508,570 contain some limitations of the claimed invention.
